

## Customer: BEKKER TRANSPORTE GmbH Just in Time Logistics

### The Company

Bekker Transporte GmbH of Emmerich was founded in 1990 and since then has successfully provided transportation at home and abroad. The range of services provided by Bekker Transporte GmbH includes partial & complete loads, logistics service, toll-free transportation, courier and special transportation, storage and packaging, and transparent logistics shipment monitoring online.

### The Assignment

TomTom WORK was asked, with its know-how in the field of telematics to enable uncomplicated and secure communication between the vehicles and the control and at the same time to enable Bekker to give customers information at any time about the exact current location of their goods.

Furthermore, the new system solution is intended to act as a vehicle security device. Additional security needed to be given to customers by kilometer-accurate accounting.

### The Solution

Bekker has chosen TomTom WORK for its fleet management solution. Bekker has equipped 14 of its 18 vehicles with TomTom WORK equipment, combined with the TomTom WORK fleet management system.

“Our truck fleet is equipped with TomTom WORK telematics equipment, which is set-up specifically for the needs of our company. Through our internal software it is possible to transmit and receive order data and status reports from the vehicle. Through GPS location we are in a position to be able to give our customers the exact location of their goods at any time. At the same time we can inform our customers about any status ...” (W. Bekker)

Vehicle fleet: 18 trucks
